Metal Detectability

BST Stainless Steel Board Clips are manufactured from 304 grade stainless steel, as such we would recommend using BST 304 grade stainless steel test pieces to calibrate your equipment to detect stainless steel contaminants to your specification.

BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment may need to be recalibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.
